

## Ultra High Molecular Weight Polyethylene UTEC3040

**Description:**

UTEC3040 is an Ultra High Molecular Weight Polyethylene with a molecular weight greater than 10 times higher than High Density Polyethylene (HDPE) resins. This extremely high molecular weight yields several unique properties to this polymer such as high abrasion resistance, impact strength and because it is a self-lubricating material, a low coefficient of friction.

**Applications:**

Applications which require highest wear resistance, Technical and porous parts, filters, compression molded sheets
