

Sustainability

BRASKEM AMERICA

At Braskem, business and sustainability are intrinsically linked. We believe sustainability is a way of conducting and developing our business, taking into consideration the needs of all stakeholders today and in the future.

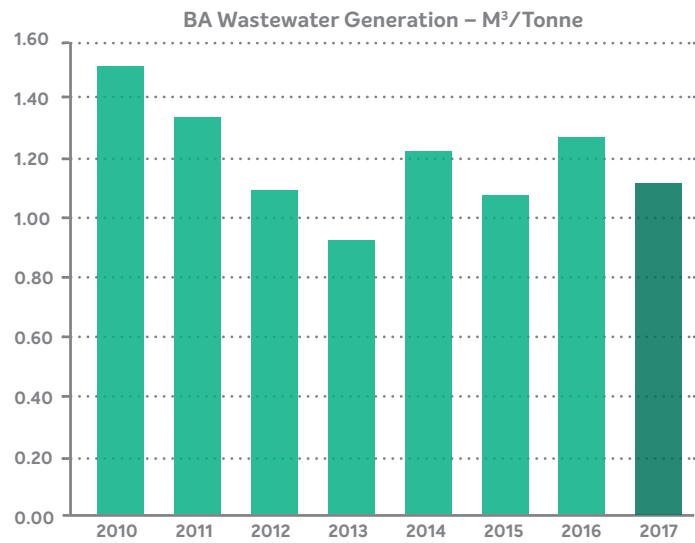

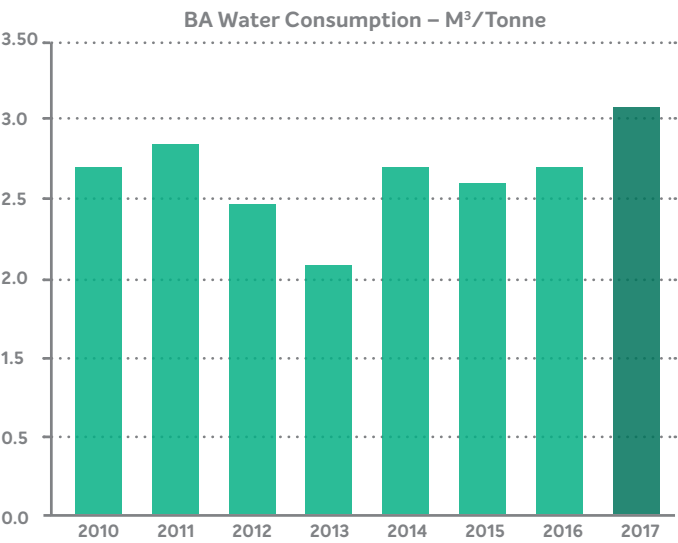

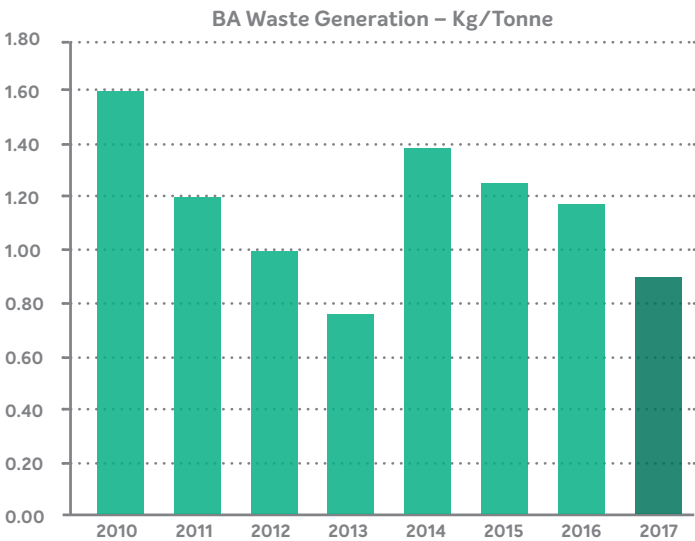

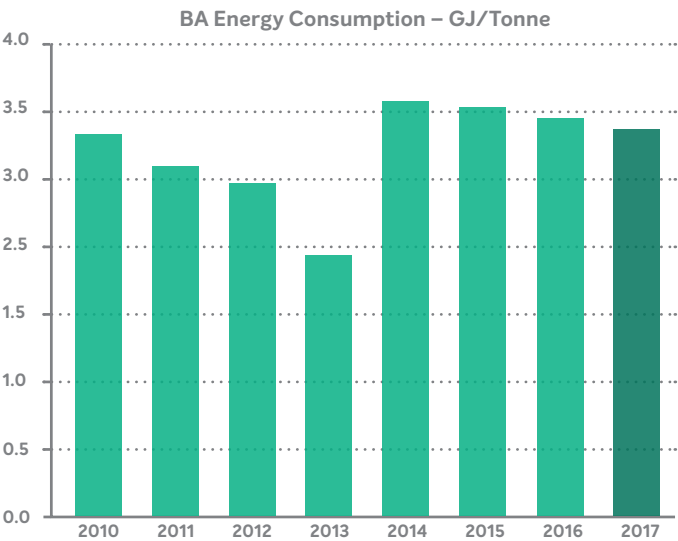

Sustainability

Certifications and Accomplishments

- Braskem is ISO 9001 Quality Management System certified and Responsible Care 14001® technical specification certified
- Listed on the Dow Jones Sustainability Index for Emerging Markets and the ISE (BM&F Bovespa Sustainability Index) in Brazil
- Braskem publicly reports HES performance in a third-party verified Annual Report prepared in accordance with the Global Reporting Initiative (GRI) G4 Guidelines
- Braskem America's Total Recordable Injury Rate reflects first quartile performance among all American Chemistry Council (ACC) members
- Braskem America's manufacturing facilities are greater than 80% landfill-free by diverting wastes away from landfills and into recycling and energy recovery processes
- Registered Braskem America's monomers in the European REACH (Registration, Authorization and Restriction of Chemical Substances) system ahead of schedule at the highest tonnage band
- Braskem annually reports its GHG emissions to the CDP Carbon Programs, in line with the GHG Protocol, in which Braskem's third-party verified inventory is classified as Gold level
- Braskem's social, environmental and governance performance was assessed by Ecovadis, who awarded the company an Advanced rating, which means it scored within the top 15% in its business sector

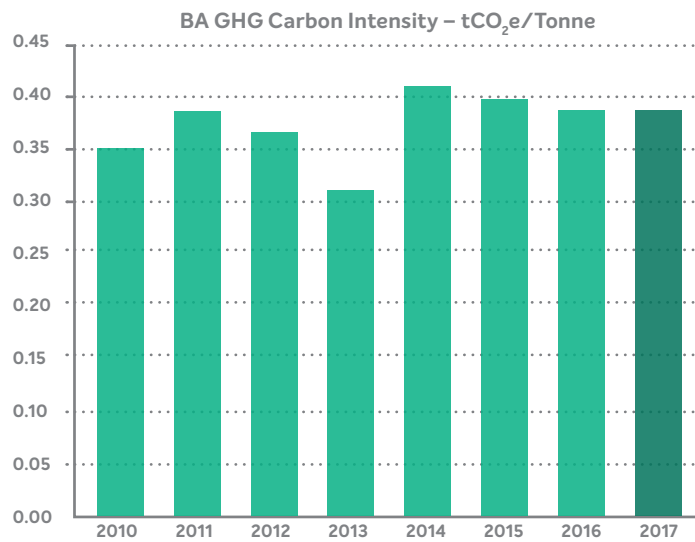

Eco-Metric Performance

Completed resource conservation projects have:

- Reduced water use by over 83,000,000 gallons per year
- Reduced GHG emissions by over 1,150 tonne per year
- Recovered over 18 billion BTUs of energy from flares annually
- Recycled over 8 million pounds per year of scrap materials

Note: 2013 includes the addition of two additional polypropylene plants; 2014 and forward include the addition of a feed purification unit without increasing polypropylene production.

With a human-oriented global vision of the future, Braskem strives every day to improve people's lives by creating sustainable solutions with chemicals and plastics.

Braskem is the largest producer of thermoplastic resins in the Americas and the leading producer of biopolymers in the world, creating more environmental-friendly, intelligent and sustainable solutions through chemicals and plastics. Braskem exports to clients in approximately 100 countries and operates 41 industrial units, which are located in Brazil, United States, Germany and Mexico, the latter in partnership with the Mexican company Idesa.

Braskem America is an indirect wholly owned subsidiary of Braskem S.A. headquartered in Philadelphia. The company is the leading producer of polypropylene in the United States, with six production plants located in Texas, Pennsylvania and West Virginia, and an Innovation and Technology Center in Pittsburgh.
